56
57   <h2 style="color:red"> Limitations of ChatGPT <!-- <span class="chapterTitle"> "Down
58     the Rabbit Hole" </span> --> </h2>
59
60   <p style="line-height: 3;">
61     ChatGPT may write responses that sound like they are correct, but are
62     incorrect. </br>
63     It may answer some questions differently or not at all even if both
64     questions logically are the same, just worded differently </br>
65     Sometimes it will give wordy responses and overuse some phrases, like how
```

```

        it's a language model trained by OpenAI. </br>
When repending to ambiguous questions, the model tries to guess what the
question is, instead of clarifying it. </br>
The model responds to inappropriate requests and show bad behavior.
</p>

</br>
</br>
</br>

</br>

<h2 style="color:red"> How ChatGPT's ability demonstrates AI's power </h2>

<p>
    ChatGPT's ability demonstrates AI's power by being able to mimic a human
    conversation. It is able to give detailed </br>
    reponses to very complex questions. It is able to respond incredibly
    quickly, faster than any human could respond </br>
    It is always running 24/7, except crashes though that doesn't count. It can
    talk to multiple users at once, giving </br>
    good responses regardless of the amount of people using it. This is
    something humans cannot do, one person cannot talk to </br>
    thousands of people at once and give good responses to all of them. ChatGPT
    knows a lot of topics and has a large knowledge base </br>
    so it can give a lot of information about a lot of different topics. I even
    wrote this paragraph using ChatGPT
</p>

</br>
</br>
</br>
</br>
</br>
</br>

</br>

<h2 style="color:red; padding-top:60px;"> What are common things it is used for</h2>

<p>
    Some of the things that ChatGPT is used for include: doing homework,
    learning about different topics, </br>
    getting help with questions, learning different recipes, help coding, and
    many more! The things you can </br>
    do with ChatGPT is (to some extent) limitless! It's like having an infinety
    knowledgeable person at your disposal! </br>
</p>
